Subject: The Microsoft case (US citizen comments)

I know Microsoft is very powerful. I know technology can very a very difficult and fast changing business to understand. But know this...By allowing Microsoft to "give away 1B to schools" is a huge victory for Microsoft. The one area it lacks total dominance.

I don't care whom oversees this implementation, the bottom line is Microsoft products will be installed and used first.

Microsoft knows what's its doing here. I hope you do too. I hope Microsoft doesn't have the Justice dept. in their pockets.
